

Clinical trials in High-Med - information for Pharma companies and CROs.

Physicians from private outpatient clinic High-Med conduct clinical trials phase II, III and IV in accordance with ICH- GCP requirements and provide specialist medical care.

Following investigators are experienced in clinical trials and research:

Dorota Bystrzanowska MD - dermatology and venereology

Prof. Hanna Wolska MD, PhD - dermatology and venereology

Kamila Padlewska MD, PhD - dermatology and venereology

Małgorzata Godziejewska – Zawada MD, PhD – endocrinology and diabetology

Iwona Szczupacka MD - gynecology

Jacek Borowicz MD – gastroenterology, infectious diseases and densitometry

Krzysztof Kłós, MD, PhD - allergology, immunotherapy / vaccines, pulmonology

Our co-investigators also have considerable experience in clinical trials and research.

Investigators from High-Med have taken part in over a dozen clinical studies in following indications:

- dermatology (psoriasis, psoriatic arthritis, atopic dermatitis, acne, rosacea, mycosis)
- allergology (asthma, atopic dermatitis, idiopathic urticaria)
- immunotherapy
- endocrinology (hyperprolactinemia, diabetes)
- gynecology (hormone replacement therapy - HRT, premature childbirth, decrease in bone mass during lactation)
- gastroenterology

High-Med can also conduct clinical trials in:

- psychiatry
- orthopaedics
- neurology

All site personnel i.e. physicians, nurses, and study coordinator are being permanently trained according to Good Clinical Practice (GCP).

High-Med was audited by sponsors of clinical trials, and every time judged very positive and as a site which met GCP standards.

High-Med is considerably experienced in:

- central laboratory
- eCRF (DataLabs, Medidata Rave, Phase Forward)
- Clinphone, IVRS, IWRS
- professional imagery - e – CASE

- skin biopsy
- allergen immunotherapy
- ECG
- spirometry

If needed in clinical study, we can cooperate with the local laboratory, pharmacy, and department of diagnostic imaging and radiology (X-ray).

In High-Med clinic are 6 consulting rooms, treatment room, waiting room, and a reception desk. Patients' source notes and study documents are stored in a separate, monitored and locked room. Access to this room is limited.

Besides that, High-Med possesses certified and validated equipment:

ultrasound scanners, refrigerators, freezer, electronic scales, thermometers min/max, glucometers, centrifuge.

Access to internet (wi-fi), phone and fax lines, copy machine and scanner is available in our clinic.

Also, separate room / working space for CRAs is provided.

High-Med has considerable experience in contacts with Ethics committees regarding registration and conducting the clinical trials in Poland.
